

PRODUCT DATA SHEET

K2 E10 NEUTRALIZER

FUEL ADDITIVE

The K2 E10 Neutralizer 50ml fuel additive improves fuel quality and reduces the negative effects of using fuels containing bioethanol (e.g. E10). Designed to compensate for reduced quality due to faster fuel aging by adding up to 10% ethanol. Used during each refueling, it stabilizes the fuel, cleans and protects the fuel system against corrosion caused by bioethanol, protects valve seats and increases the octane number. It can be added to all types of gasoline, also with other additives, in both gasoline and hybrid cars.

Directions: Add to the fuel tank before each refuelling of E10 fuel. One bottle is sufficient for 40 to 60 litres of petrol.

Please note: Use the entire pack at a single refuelling.
